Equine Vaccination Recommendations

Core Vaccines:

It is recommended that all horses be vaccinated for the following diseases:

- Eastern Encephalomyelitis (Sleeping Sickness)
- Western Encephalomyelitis (Sleeping Sickness)
- West Nile Virus
- Tetanus
- Rabies

Risk Based Vaccines:

Horses exposed to other horses at boarding facilities, shows, rodeos, trail rides or other events may benefit from additional protection from contagious upper respiratory diseases. Recommended vaccinations include:

- Equine Influenza
- Rhinopneumonitis
- Strangles

Horses living near natural water sources may need vaccination against:

- Potomac Horse Fever

Protection against abortion is recommended to vaccinate mares at 3, 5, 7, and 9 months of gestation against:

- Rhinopneumonitis

General Guidelines:

Vaccination should begin at 4-6 months of age in foals followed by a booster vaccination in 3-4 weeks and then annually thereafter.

Let us help you determine what vaccination plan fits best for your individual horse.
